## Make Moves | The All-New Tomos Classic XL Moped

Even though the moped is a throwback ride, it's making a comeback. Somewhere between the scooter and the motorcycle lies the moped. While this was a hot mode of transportation in the 70s and 80s, it lost some steam as time went on. Like all cool things, they come back and trend. The **Tomos Classic XL Moped** is making good with that and making limited comeback run in the U.K.

The new Tomos Classic XL Moped is not only nice to look at, but fuel efficient and cool. It is a very sleek and compact pedal-start moped with a 49cc engine and boasts a top speed of 27-mph. Many young dig this model because it is so cool and cost efficient. While those sound like cool specs, they jive well in the U.K. but they make life on a moped hard in the States. A ride like this would require a motorcycle license in the United States. Booooooo. So these may not be highly favored in the U.S. These Tomos Classic Mopeds will go on sale for a limited time for about \$2,150 (after conversion from the euro). They will probably sell well and hopefully with some fine tuning, make their way to the States.

Signed, Tamika Frye
